

Solutions That Pay

3Delta Systems[®] Meets Payment Card Industry Data Security Standards for Fifth Straight Year

New State-of-the-Art Data Center is Outgrowth of 3DSI's Commitment to Credit Card Security and Technology Excellence

Chantilly, VA – October 28, 2008 – 3Delta Systems, Inc. (www.3DSI.com), a leader in online credit card payment solutions, announced today that an independent auditor has recertified 3DSI's business processes, systems and controls for compliance with the Payment Card Industry's Data Security Standards (PCI DSS) for the fifth year in a row. The recertification also encompasses 3Delta Systems' new state-of-the-art data center that houses the company's advanced electronic payment network infrastructure.

"Merchants who handle credit card and other payment transactions over the Internet now have even more reason to feel secure using 3DSI's online products and services," said Aaron Bills, co-founder and chief operating officer of 3Delta Systems. "Being PCI-certified for five years running means 3Delta Systems' online suite of products and technologies continue to meet the most stringent industry criteria for processing and storing confidential payment data. Our focus on surpassing – not just meeting – the PCI standards and applying information security and technology best practices to everything we do, such as our new data center, are integral to 3DSI's ongoing commitment to excellence in helping merchants easily process and safeguard their customers' electronic credit card transactions."

The PCI Data Security Standards (www.pcisecuritystandards.org) are the payment industry's foremost benchmark for cardholder account security, and 3Delta Systems is one of only 484 organizations worldwide to be recognized as PCI DSS-compliant. The standards were first established by the PCI Security Standards Council in 2006 to provide all merchants and organizations that process, store or transmit payment card data with strong technical and operational requirements for safeguarding cardholder data. These standards encompass 12 core requirements covering security management, policies, procedures, network architecture, software design and other protective measures. The major credit card brands – American Express, Discover Financial Services, JCB International, MasterCard Worldwide and Visa Inc. – established the Council to foster increased payment data security through global adoption of the PCI DSS and provide high levels of protection against data theft and fraud.

About 3Delta Systems[®]

3Delta Systems, Inc. (3DSI) is a payment solutions company that delivers the power of secure, Internet-based purchase and credit card processing solutions to enterprise, business-to-business and business-to-government customers. 3DSI's complete suite of payment solutions – each designed from the ground up to be scalable, easy to implement and conform with PCI Data Security Standard best practices – enables merchants and buyers to manage, authorize and settle payment transactions in real

time. As a leading Software-as-a-Service (SaaS) provider, 3DSI processes more than 5 million payment transactions worth more than \$5 billion for over 2,500 corporations and government institutions each year.
